\u2714 Fun to play

\u2714 Awesome graphics

\u2714 Great sounds. EXPAND THIS TO SEE MORE OF THE REVIEW, THE VIDEO IS NOT ALL

Video Review here: <https://www.youtube.com/watch?v=yMSAGxhWzFM>

- This game is a good Couch Co-op game that will work well for 2 or more people (up to 4) in a room.
- This game doesn't need a controller to play, but it is a good thing to have one or two on hand, it will definitely help.
- You aim by moving, so get used to that, it's an interesting concept used in some other games, but you will need to learn how to use recoil to keep you stationary.
- This game is very fast paced, if you like slower games, this is not for you.
- The game is limited to the environment and how you can play. You take as much fun out of this game as the effort you and your friends are willing to put in.
- This game allows you to create maps for you to play in with your friends or bots, but I haven't seen any Steam Workshop compatibility. I don't know if I just didn't see it or it is not implemented at all.

Things for the developers:

- If you go out of the map boundaries on the Top, Left or Right, you will stay out of bounds until you can feel your way back in or make it to the bottom of the map so that you can respawn. Please make it so that if you leave the screen on the left, you arrive on the Right or keep it as is, but make it so that you are still visible, whether that requires the camera to be pulled back or it moves with the players.
- Add the choice to pick and use different colors for the environment, whether it's a basic color set or a RGB color wheel, it would be nice to have more variety than just white blocks.
- Powerups? maybe it's pushing the boundaries of Smash Brothers, but it would be a nice game mode to have to keep the game interesting and keep some variety.
- Consider a way of adding online co-op compatibility. Don't host servers yourself as they will be high cost and there will be a high latency, which will not suit this game very well. Rather go with the approach of allowing players to create servers themselves and then allowing other players to join to said server. Whether that requires adding a Dedicated Server option where you download another software to host or you can just host as you play.

Overall this game is a great time killer, I play it when i'm rendering a video as it doesn't take that much CPU or GPU power. It is okay to play with yourself and bots, but if you really want to enjoy yourself, get some friends over to play. Great job on the game so far! I would love to see where the development takes this game.. I first played this game 20 years ago on the old Amiga system It was Great then

The transfer to pc and steam version has lost nothing

This was a Giant in its time its still Dam good now

If you Like maps and amies you will like this. Yes its a bit dated and the graphics show that, but the gameplay and startagry are as good as ever.. ***WARNING*** This game is pretty terrible - you start off thinking that it's like a copycat version of a Final Fantasy game... which isn't so bad. Then, you push the button the first time (after the small dialogue of broken English) and the remaining dialogues are in Russian! WTF??? I probably only spent like a dollar on this game, but it makes me trust the Steam reviews a little bit less. I used the positive reviews to make my choice, so I'll be more careful in the future.... Not bad at all, fun little game.. Underwhelming.

10/10. I \u2665\ufe0f\ufe0f\ufe0f\ufe0fING LOVE THIS GAME ^XDD
